

## India's external debt stands at about USD 530 billion at end March 2018

India's external debt stands at about USD 530 billion at end March 2018, recording an increase of US\$ 58.4 billion over its level at end-March 2017. At end-March 2018, India's external debt witnessed an increase of 12.4 per cent over its level at end-March 2017, primarily on account of an increase in commercial borrowings, short-term debt and non-resident Indian (NRI) deposits. The increase in the magnitude of external debt was partly due to valuation loss resulting from the depreciation of the US dollar against major currencies. The external debt to GDP ratio stood at 20.5 per cent at end-March 2018, higher than its level of 20.0 per cent at end-March 2017.
